AIRPORT FACILITY AND RUNWAY REPAIRS

FASTPATCH Concrete Repair & Joint Sealing systems provide long lasting, durable repairs that allow for rapid return to service, within an hour of installation.

- Using the Willamette Valley Company (WVCO) meter, production is estimated at 8X the rate of repair using traditional cementitious or concrete repair systems and methods.

- Cracks, spalls, static joints* and pot-holes are repaired instantly avoiding F.O.D.
**for dynamic joints use EJC-25 expansion joint.*

versus

- Labor Intensive
- Physically demanding
- Slow prep, placement & cure
- Hazardous to use
- Very rigid
- Short lifespan
- Long cure time

- Single operator
- Just pull the trigger
- No conditioning or finishing
- 100% solids, zero vocs
- Integrally flexible
- Long Lasting & durable
- Return to service in < 1 hour
